

## Storage, Packing and Shipping Instructions

Please retain the enclosed bar-coded document with container number and pass code for tracking and documentation.

### **Battery Containers**

#### **Approved Contents**

**Acceptable batteries** – Dry cell only. Additional charges may apply if you ship non-approved contents, an incorrectly assembled container or a container weighing more than seventy (70) pounds.

#### **Battery Container Assembly**

- Remove container from protective outer box, save for return shipment.
- Insert plastic bag into container / bucket.

#### **Battery Storage**

Keep container closed when in storage.

#### **When Container is Full / Return Shipping**

- Make sure only dry cell batteries are in container and weight does not exceed 70 pounds.
- When full, secure locking lid.
- Place container back into protective outer box.
- Fold the flaps of the open end in the order indicated and tape all edges. Do not cover the return shipping label.
- Complete shipper information on container label.
- Remember to reorder a replacement container.
